

H2PRO[®] Wool & Silk Detergent's advanced formula allows superb wetcleaning of water sensitive items, that in the past could only have been drycleaned

Professional Wetcleaning Detergent for Water-Sensitive Items & Fine Washables

H2PRO[®] Wool & Silk Detergent is specifically designed for wetcleaning water-sensitive items like wools, silks, rayons, and other fine washables in professional wetcleaning machines. It is strong enough for effective stain and soil removal, yet gentle enough for use with water sensitive items processed in professional wetcleaning.

H2PRO Wool & Silk Detergent contains a buffering system, which helps stabilize fabrics by lowering the inter-fiber friction during the cleaning process, which reduces felting and shrinkage. This buffering system also aids in minimizing dye bleeding to help preserve colors and retain their intensity.

With highly active ingredients, **H2PRO Wool & Silk Detergent** is extremely effective in loosening, surrounding and suspending soil until it can be rinsed away. This helps ensure that whites stay white and colors stay bright.

When water is the best choice, use **H2PRO**.

- **Specifically Formulated For Wetcleaning Waters Sensitive Fabrics**

Effective chemistry is a crucial element when wetcleaning delicate fabrics, like wools, silks, rayons, and other fine washables. **H2PRO Wool & Silk Detergent** offers the best possible care for these fabrics, helping protect against fiber damage and shape loss.

- **Powerful But Gentle Cleaning**

H2PRO Wool & Silk Detergent effectively penetrates, releases and suspends greases, stains and soils, letting the machine do the cleaning instead of the spotting board.

- **Loosens & Suspends Soils To Prevent Redeposition**

H2PRO Wool & Silk Detergent is designed to safely and effectively loosen and suspend soil for removal during the rinse cycle. Its excellent soil suspension properties help to prevent redeposition and greying.

- **Prevents Dye Bleeding & Keeps Whites & Colors Bright**

H2PRO Wool & Silk Detergent has controlled pH to help prevent dye bleeding and a special buffering system helps to protect colors from fading; keeping whites white and colors bright.

- **Reduces & Helps Prevent Felting & Shrinkage**

A specially-designed buffering system helps reduce felting and shrinkage to keep your clothes looking like new and protects against cleaning-related damage.

- **Performs Effectively at Low Temperatures**

Some detergents require higher temperatures to remove soil effectively. **H2PRO Wool & Silk Detergent** is specially designed to produce great results even in lower temperature water.

Instructions for Using H₂PRO® Wool & Silk Detergent

Follow garment care label and garment fiber content and construction to select appropriate washing and drying settings and finishing methods. Before cleaning garments, remove any solvent-soluble or hard-set stains using the appropriate Street's stain removers.

Professional Laundry or Wetcleaning Machines

- For best results, use this product in conjunction with **H₂PRO Conditioner**.
- Use 1 – 3 US. oz. (30 mL – 90 mL) of **H₂PRO Wool & Silk Detergent** per 10 lbs (4.5 kg) of fabric.
- Use cold or warm (85°– 95° F/ 29°– 35°C) water.
- Set wash cycle at 4 to 6 min. with no more than 50% washer capacity and use minimum agitation.
- Rinse in cool water (70° – 85 °F/ 21° – 29°C) if desired. Consistency of water temps is important to prevent fabric shock and distortion. If water temperature can be programmed, results will be more consistent if the rinsing is kept between 70° – 85 ° F (21°– 29°C) degrees, year round.
- Drain and extract.
- Dry according to care label instructions - but not above 120°F (49°C).

Fabric Finishes

For fabrics requiring a soft and supple hand such as cotton sweaters, blankets, golf shirts and woolens, add additional **H₂PRO Fabric Conditioner** to the final rinse cycle. For fabrics requiring a firm hand, such as tailored items like suits or fabrics which are difficult to press after processing in water such as rayon, linen and cotton, add **GELATONE® Fabric Finish** to the final rinse. Refer to the product packaging or sales sheet for specific use instructions.

How to Order H₂PRO Wool & Silk Detergent

H₂PRO Wool & Silk Detergent is sold by authorized Street's distributors everywhere. **H₂PRO Wool & Silk Detergent** is available in single one-gallon containers, cases of four, 5-gallon pails or 15-gallon drums.

Before using any chemical product, review the Safety Data Sheet (SDS) for safe handling and proper disposal.

For professional wetcleaning & laundry use only.
