

RescueTEX™

Removes Tough Odors. Fast

Highly effective
for removing
challenging odors
like smoke, mildew,
and mold.

Odor Eliminator

Eliminating odors is a critical part of any cleaning professional's job. Consumers expect their garments to be returned odor-free; it is one of the primary reasons that they bring items in to be cleaned. You need an additive that can remove odors quickly and permanently; you need RescueTEX. RescueTEX is highly effective odor eliminating technology. All professional cleaners face challenging odors and can benefit from RescueTEX.

Whether you do restoration work and clean items damaged by smoke, floods, or other disasters, or are fighting the challenging odors encountered in regular cleaning, RescueTEX comes to the rescue.

- **Permanently Removes Smoke, Mildew & Other Tough Odors**

RescueTEX's advanced formula instantly binds with odors, so that they can be removed permanently. RescueTEX is effective in helping eliminate tough odors including smoke, mildew, mold, perspiration, urine, skunk, pet and other challenging odors.

- **Versatile – For Use in Machine or Spray Applications**

RescueTEX can be used in drycleaning, laundry or wetcleaning applications. RescueTEX may also be used in spray applications on individual items prior to processing or on items that are processed by hand or outside of the machine, such as shoes, purses, luggage, stuffed animals and upholstery.

- **Use as a Preventative Odor Treatment**

Cleaning operations, particularly high volume ones, may miss items with odors or may choose not to individually treat loads or items that have odors. Use RescueTEX as an additive in every load to help remove odors that may have been missed prior to cleaning.

- **Increases Stain & Soil Removal On Heavily Soiled Loads**

Heavily dirty loads may require more odor and stain removing cleaning power than is required for a typical load of items encountered in regular cleaning. RescueTEX can provide the added stain and odor fighting power needed for the more challenging loads faced by all cleaners. In these cases, use of RescueTEX will also aid in cleaning the whole load, not just the garments with odors.

FOR RESTORATION PROFESSIONALS

- **Ideal for Restoration Work**

RescueTEX was designed to meet the demands of restoration work. The difficult odors and heavily sooty and dirty loads found in restoration work, often require more odor, stain and soil removing cleaning power than is required for a typical load of items encountered in regular cleaning. RescueTEX is designed to provide the added stain and soil removal power required for these types of loads.

- **Reduces Re-cleans & Ozone Time**

RescueTEX is so effective on heavy smoke and other odors that it reduces and, potentially, eliminates the need for ozone treatment and re-cleans for some loads and individual items. This can lower labor costs, by reducing the number of times that you need to handle an individual item, and can speed up production time, making it easier to meet tight production deadlines and respond quickly to incoming work.

All ingredients are biodegradable. Contains no Proposition 65 listed ingredients or halogenated compounds.

Instructions for using RescueTEX™

Use RescueTEX to permanently remove tough odors like:

Smoke Odors
Mildew Odors
Mold Odors
Perspiration Odors
Urine Odors
Skunk Odors
Pet Odors & More

RescueTEX is safe to most fabrics and colors. If colorfastness is questionable, test first on a hidden area of the item.

For Removing Odors by Drycleaning

For a two-bath process: Add 2 oz. of RescueTEX per 10 lbs. of load into the first bath or pre-wash*‡. Stronger odors may require an additional 1 oz. of product per 10 lbs., as needed.

For best results on smoke and heavy odors, add 2 oz. of RescueTEX per 10 lbs. of load into the pre-wash and an additional 2 oz. per 10 lbs. of load into the main wash*.

For a single-bath process: Add 2 oz. of RescueTEX per 10 lbs. of load*‡. Smoke loads and especially strong odors may require an additional 1 oz. to 2 oz. of product per 10 lbs., as needed.

For Removing Odors by Wetcleaning or Laundering

Add 2 oz. of RescueTEX per 10 lbs. of load into the pre-wash or main wash. Depending upon severity of odor, an additional 1 oz. or more of product per 10 lbs. may be added to the main wash, as needed.

For Preventative Odor Control in Every Load in Drycleaning, Wetcleaning & Laundry

Add 1 oz. of RescueTEX per 10 lbs. of load into the pre-wash*‡ or main wash*.

For Spray Applications & Additional Uses

RescueTEX may be sprayed on individual items prior to processing. RescueTEX may also be used on items that are processed by hand or outside of the wheel such as shoes, purses, luggage, stuffed animals, upholstery and many other items. Simply spray the item with RescueTEX prior to processing.

RescueTEX has been purposely formulated without an added fragrance. If an added fresh scent is desired, use with FreshTEX. Follow FreshTEX instructions for use: Add 1/4 oz. (1 capful) of Street's FreshTEX™ for every 10 lbs. of load during the main cleaning cycle or in the last rinse cycle. Adjust the concentration to impart the desired effect.

How to Order RescueTEX

RescueTEX is available from authorized Street's distributors everywhere in single gallon containers or boxes of four, 5-gallon pails or 15-gallon drums.

** For drycleaning, if bath is not sent to still, use only in machines using a detergent.*

‡ For drycleaning, if adding RescueTEX manually, for best results, add RescueTEX to the machine (e.g., button trap) before placing the load into the machine.

If colorfastness is questionable, test first on a hidden area of the item or garment.

Before using any chemical product, review the Safety Data Sheet (SDS) for safe handling and proper disposal.

Specially labeled spray bottles are available from your distributor.

For professional drycleaning, wetcleaning and laundry use only.
